## **STRATEGIES EMPLOYED**

The Fund adopts a top-down and bottom-up approach for its investment strategy, recognizing that these are not mutually exclusive processes. The investment policy is to invest in companies that are seen to be undervalued as compared to their fair value in the expectation that their share prices will rise at some point to more accurately reflect their true worth. These companies are also likely to have a potential for earnings growth.

#### **MARKET REVIEW**

The fund recorded a -6.64% performance for the six months, trailing the benchmark by -2.49%. Despite the recent volatility, we maintain a positive outlook on equity markets.

The US economy has remained resilient as we head into 2025. On the 19th Dec 2024, the FED cut US interest rates by 25-bps to 4.50%. Importantly, FED Chair Powell signalled that the FED's policy stance has entered a "new phase" and that it will move cautiously on further rate cuts. Meanwhile, the median "dot plot" now expects only 2 rate cuts in 2025 (total of 50 bps) vs more bullish expectations of 4 cuts back in Sep-2024.

As President-elect Donald Trump prepares to return to the White House on 20th Jan 2025, markets are bracing for widespread tariffs on China and the rest of the world. The impact of such tariffs may adversely affect Asia's growth and exert downward pressure on their currencies. Since 27th Sep 2024, the DXY (USD Currency Index) has rallied 9.3% to 109.7. During periods of Dollar strength, liquidity invariably leaves Emerging Markets and returns to Developed Markets. With USD "exceptionalism" (strength) expected in 2025, this will represent a significant headwind for Asian markets.

In Malaysia, the Ministry of Finance (MOF) expects the economy to grow at a modest 4.5% to 5.5% in 2025. The forecast appears reasonable given the resilience of the global economy and the slew of domestic initiatives under the Madani government. In particular, the improvement in private investment spending is encouraging.

#### MARKET OUTLOOK

In our view, the KLCI will be supported by a bunching-up of thematics. This includes the launch of the Johor-Singapore Special Economic Zone (JSSEZ), the government directed focus on domestic investments by government-linked investment companies (GLICs), robust foreign direct investments (FDIs) including into data centres and semiconductors, implementation of the National Energy Transition Roadmap (NETR) and Penang Transport Master Plan.

We increased our exposure to Singapore slightly as we are positive on Singapore banks due to their dividend yields and exposure in non-interest income, treasury revenue and better asset management contribution as interest rates fall.

Malaysia's valuations are undemanding ie. 12-month forward PER of 14.1x (10Y range 12.2x to 19.3x), PBR of 1.4x (10Y range 1.1x to 2.0x) and forecast DY of 4.2% (10Y range 3.1% to 4.8%) [source: Bloomberg]. Our strategy is biased towards domestic plays which are insulated from some of the external headwinds. We are keeping a higher level of cash in view of the short-term uncertainties and are looking for lower levels to buy.

#### **DISTRIBUTIONS**

For the financial period under review, the Fund did not declare any income distribution.

#### **DETAILS OF ANY UNIT SPLIT EXERCISE**

## (b) Interest Rate Risk

Cash and other fixed income securities are particularly sensitive to movements in interest rates. When interest rate rises, the return on cash and the value of fixed income securities will rise whilst it will be vice versa if there is a fall, thus affecting the NAV of the Fund.

The Fund does not have any significant balances which are subject to interest rate risk as defined in MFRS 7, hence is not exposed to interest rate risk.

## (c) Particular Stock Risk

Any major price fluctuations of a particular stock invested by the Fund may adversely or favourably impact the NAV of the Fund. However, due to the diversification nature of the unit trust, the impact would not be as major as investing in one particular stock.

#### Particular stock risk sensitivity

Particular stock risk sensitivity is not presented as a reasonable possible change in any one equity index will not have a significant impact on the financial performance of the Fund.

## Particular stock risk concentration

The Fund's concentration of equity price risk analysed by the Fund's equity instruments by sector is as follows:-

## 17.1 FINANCIAL RISK MANAGEMENT POLICIES (CONT'D)

## (d) Liquidity and Cash Flows Risk

Liquidity risk refers to the ease to convert investments into cash without significantly incurring loss in value. Stocks issued by smaller companies will face a greater chance of liquidity risk as compared to stocks issued by larger companies. When investing in stocks of smaller companies, the historical volume traded would be analysed to minimise the liquidity risk.

## (e) Fund Manager's Risk

The performance of the Fund is also influenced by the expertise of the Fund Manager. The investment committee will oversee the activities and performance of the Fund Manager. There is also the risk that the Fund Manager does not adhere to the investment mandate of the Fund. The investment committee and the compliance unit hold primary functions to ensure that the Fund's investment strategy and mandate are adhered to. A compliance checklist and investment performance report shall be presented for review during the investment committee meeting.

#### (f) Credit Risk

The exposure to credit risk, or the risk of counterparties defaulting, arises mainly from sundry receivables.

### (i) Credit Risk Concentration Profile

The Fund does not have any major concentration of credit risk related to any individual customer or counterparty.

### (ii) Maximum Exposure to Credit Risk

As the Fund does not hold any collateral, the maximum exposure to credit risk is represented by the carrying amount of the financial assets as at the end of the reporting period.

## 17. FINANCIAL INSTRUMENTS (CONT'D)

### 17.1 FINANCIAL RISK MANAGEMENT POLICIES (CONT'D)

## (f) Credit Risk (Cont'd)

## (i) Assessment of Impairment Losses

At each reporting date, the Fund assesses whether any of the financial assets at amortised cost are credit impaired.

The gross carrying amounts of the financial assets are written off against the associated impairment, if any, when there is no reasonable expectation of recovery despite the fact that they are still subject to enforcement activities.

#### Receivables

The Fund applies the simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all receivables. No expected credit loss is recognised as it is negligible.

A financial asset is credit impaired when the receivable is in significant financial difficulties.

The Fund considers a receivable to be in default when the receivable is unlikely to repay its debt to the Fund in full or is more than 90 days past due.

## **Bank Balances**

The Fund considers the licensed banks have low credit risks. In addition, some of the bank balances are insured by Government agencies. Therefore, the Fund is of the view that the loss allowance is immaterial and hence, it is not provided for.

### 17.2 CAPITAL RISK MANAGEMENT

The Manager of the Fund manages the capital of the Fund by maintaining an optimal capital structure so as to support its businesses and maximise unitholders value. To achieve this objective, the Manager may make adjustments to the capital structure in view of changes in economic conditions, such as adjusting the amount of dividend payment, returning of capital to unitholders or undertake a unit splitting exercise to lower the value per unit of the Fund, thus the units become more affordable to raise more funds.
